

Mohamed Kadri

Telecom Project Manager | Huawei Projects | PMP

Dubai, United Arab Emirates | +971 522 994 953 | eng_mohamedkadri@hotmail.com | linkedin.com/in/mohamed-kadri-b3508916 | Notice period: one month | Open to international relocation

PROFESSIONAL SUMMARY

Telecom Project Manager with 17+ years in the telecommunications industry, including 9+ years managing **Huawei projects** for Tier-1 mobile network operators (du UAE, MTN South Africa, Zain KSA, and an operator in DR Congo) across UAE, KSA, Egypt, South Africa, DR Congo and Bahrain: proven international mobility. End-to-end delivery of mobile broadband and **5G programs, network rollout, modernization and digital transformation**: scope, schedule, budget and cost control, risk and issue management, resource planning, change control and executive reporting. Coordinates multidisciplinary teams across RAN, transport, integration, field operations and customer organizations. Delivered at scale: 400+ enterprise links and 600 site hops for du 5G and B2B, 1,600 enterprise broadband links in Egypt, and rollout and modernization programs in Africa, on time and within SLA. Adds next-generation operations depth: NOC digital transformation, AIOps and OSS cloud migration.

KEY ACHIEVEMENTS

- Managed **Huawei projects for Tier-1 MNOs for 9+ years** (du UAE, MTN South Africa, Zain KSA, DR Congo operator), spanning the du MBB (mobile broadband) program, **5G and B2B delivery, rollout, modernization and network transformation**.
- Delivered approximately **400 enterprise links and 600 site hops for du 5G and B2B** (E-band, Super Dual Band, long-haul trunk) within SLA, coordinating RAN, transport, civil, field and customer teams; achieved **microwave acceptance and SLA billing within stipulated SLAs** leading the Huawei acceptance team.
- Led **network rollout and modernization in DR Congo**: 12 long-haul hops, all contracted units closed within SLA, with automated handover to operations.
- Delivered approximately **1,600 B2B enterprise broadband links** across Egypt at Etisalat Misr; directed migration of **97% of the network from TDM to IP** and installed and upgraded **70+ MW links at a 95% first-time success rate**.
- Drove NOC digital transformation for du: **75% Level-1 incident automation at 99.6% SLA** via AIOps and **11% OPEX reduction** via OSS cloud migration; delivered a **fiber smart monitoring solution for Zain KSA** (GIS + OTDR).

CORE COMPETENCIES

- Project delivery and PMO:** end-to-end lifecycle, milestone and gate governance, project governance, on-time and on-budget delivery
- Cost management:** budgeting, cost control, revenue triggers, financial reporting
- Quality and acceptance:** quality assurance, ATP, HLD/LLD, SLA and KPI compliance
- Stakeholder and communication:** client and stakeholder management, executive reporting (Power BI, Fine BI, Grafana)
- Change control and integration:** change management, cross-team and cross-network integration
- Methodology and standards:** PMP and PMBOK, ITIL v4, eTOM, HSE and site safety
- MW planning tools:** Pathloss, MapInfo, Google Earth, Huawei planning tools
- RF and site:** RF planning, link capacity and budgeting, LOS surveys, site acquisition, civil and pole works, antenna alignment
- Multi-vendor MW:** Huawei OptiX RTN, NEC, Ericsson, Cambium, Intracom, Proxim, Redline
- Infrastructure and tooling:** Azure, VMware, OpenStack, Ansible, Terraform, CI/CD, HP Event Management

- Planning and control:** scope and WBS, scheduling (MS Project, Jira), resource planning, progress tracking
- Risk and issue management:** RAID and risk register, mitigation and contingency, minimal downtime
- Procurement and vendors:** RFP and bid preparation, vendor, subcontractor and supplier management
- Leadership:** direct-team leadership (3 to 15 engineers), up to 7 subcontractors and vendors per project, training and development
- Multidisciplinary coordination:** RAN, transport, integration, field operations and customer teams for MNOs
- Microwave and backhaul:** PTP and PTMP, E-band, Super Dual Band, long-haul trunk, non-LOS, hybrid MW/fiber
- Transport and access:** SDH/STM-1, IP/MPLS backhaul, OTN/DWDM, GMPLS, SDN/NFV, TDM-to-IP migration, GPON/XGS-PON FTTx
- Spectrum and regulatory:** frequency licensing and coordination (NTRA Egypt), E-band, PtP frequency-pool management
- NOC, OSS and AI:** AIOps and ML-driven assurance, OSS/BSS, OSS cloud migration (Docker/Kubernetes), ISO 27001 and NIST, AI and agentic automation

PROFESSIONAL EXPERIENCE

Technical Operations and Project Manager, du account (Feb 2022 - Present)

- Managed the **du MBB (mobile broadband) program** as primary customer interface: KPI-aligned delivery strategies, **project governance and executive reporting** (Power BI, Fine BI), continuous quality monitoring; supported **5G enterprise service delivery**, readiness planning and operational risk assessment.
- Architected end-to-end **AIOps** for the NOC: ML anomaly detection, predictive analytics and topology-based root-cause analysis, achieving **75% Level-1 incident automation, 99.6% SLA** and zero critical disruptions at peak demand; delivered Smart Assurance, GIS heat-mapping and **network-wide iPowerStar intelligent power optimization (11% energy reduction)**.
- Established a mission-critical **regional NOC Operations Command Center** monitoring multi-vendor infrastructure across **5 countries at 99.95% service availability**.
- Delivered a **fiber smart monitoring solution for Zain KSA (2023)**: GIS visualization integrated with OTDR for accurate fault localization and optimized field operations.
- Pioneered **OSS migration from physical infrastructure to containerized cloud** (Docker/Kubernetes) under ISO 27001 and NIST controls: risk-managed, phased data migration (data sources, retention, reconciliation), delivering **11% OPEX reduction at 99.95% availability**.
- Delivered secure application and server onboarding across departments (du and enterprise/government customers): HLD acceptance, installation, pilot, ATP and production migration; **disaster recovery with active heartbeat**; security acceptance across information, architecture and network security including **penetration testing**; integration with **Active Directory/IAM and SIEM**; onboarding of LLM-enabled enterprise systems.
- Designed an **intelligent customer-support chatbot for home wireless services**: automated troubleshooting, ticket correlation and priority handling.
- Authored **HLDs, LLDs and PoCs**; integrated multi-vendor access and IP equipment (Nokia, Juniper, Cisco) into OSS/BSS for inventory, fault, performance and provisioning.

Transmission and Microwave Projects Consultant, Middle East (Mar 2020 - Jan 2022)

- Owned delivery of all **5G and B2B microwave transmission** for du: approximately **400 enterprise links and 600 site hops** over E-band, **Super Dual Band** and long-haul trunk microwave (Huawei OptiX RTN).
- Managed full scope end to end: PTP and PTMP link planning (Pathloss, MapInfo, Google Earth, Huawei planning tools), LOS surveys, **site acquisition, civil and pole works at customer sites**, antenna installation and alignment, and integration with 5G RAN, core and access networks.
- Prepared **RFPs** (resources, equipment, revenue triggers); owned **project budgets and cost control**; led direct teams of 3 to 4 engineers and managed and trained **up to 7 subcontractors and vendors per project**; planned and reported via **MS Project**.
- Handled **spectrum and regulatory**: E-band (license-free in UAE) and a managed pool of PtP low-band frequencies with coordination; negotiated customer acceptance criteria aligned to network KPIs and defined MW performance and implementation checklists.
- Led the acceptance team achieving **microwave acceptance and SLA billing within stipulated SLAs**; audited deliverables before customer submission; supported **pre-sales for new microwave products**, solution trials and customer training.

Huawei Technologies (GSRC) | South Africa and DR Congo

Feb 2019 - Mar 2020

Microwave Delivery Manager, DR Congo (Nov 2019 - Mar 2020)

- Led the microwave **long-haul delivery and modernization team: 12 long-haul hops**, all contracted units closed within SLA; led the integration team for quality and service creation on new sites; set up the network database and automated connectivity handover to operations.

Service Delivery Manager, MTN South Africa (Jul 2019 - Oct 2019)

- Accountable for transmission-medium selection (fiber, GPON, MW PTP, MW PTMP, non-LOS) per business case and **PTP/PTMP link capacity planning** for enterprise services; confirmed network capacity and stability with MTN departments before delivery commitments; supervised the MTN-to-Huawei TX planning transition; delivered **GPON/XGS-PON FTTx** broadband (Huawei MA5600/MA5800 OLTs).

Network Operations Team Leader, MTN South Africa (Feb 2019 - Jun 2019)

- Interfaced with planning, ROT and FM teams to clear the TX network of alarms; analyzed TX alarms and identified root causes; advised on change management to keep the network clear and improve optimization effectiveness.

Etisalat Misr | Egypt

Sep 2011 - Jan 2019

Network Operations Senior Supervisor (Jul 2016 - Jan 2019)

- Led a **15-person NOC monitoring 3,000+ multi-vendor elements** (access, transmission, IP aggregation) under managed-service contracts with SLA/KPI governance and ITIL-aligned incident, problem and change management.
- Ran the planned-activity team (LOS resolution, availability enhancement, battery replacement, site recovery, hub offloading) and the electro-mechanical team (generator availability, preventive maintenance, refueling); improved customer experience through TT resolution with RF planning and optimization.

Transmission Principal Engineer (Jan 2014 - Jun 2016)

- Delivered end-to-end **B2B enterprise transmission: approximately 1,600 enterprise broadband links** over microwave, E-band, Pri-WiMAX and fiber across multi-vendor equipment (Huawei, Ericsson, Cambium, Intracom, Proxim, Redline); owned CPE provisioning, acceptance testing and field hand-off with standardized checklists.
- Managed **B2B projects end to end**; coordinated **spectrum and regulatory with NTRA** on Pri-WiMAX free-band and E-band; interfaced with pre-sales to shape cost-effective access solutions and met customers to define requirements.

Transmission Senior Engineer (Sep 2011 - Dec 2013)

- Installed and configured Huawei and Ericsson MW links and upgraded NEC links; delivered new **MW links and rings, STM-1/SDH** connections and HW/SW upgrades to monthly availability and performance targets; directed migration of **97% of the network from TDM to IP** and installed and upgraded **70+ MW links at a 95% success rate**.

Transmission Engineer | Huawei Technologies, Egypt

Feb 2010 - Aug 2011

- Installed and configured **Huawei and Ericsson microwave links** and upgraded NEC links for expansions and new sites; delivered **lub expansion and TDM-to-IP migration** to monthly dashboard targets.

- Installed and integrated **2G/3G RAN (Huawei BTS, NodeB, BSC)** for greenfield rollout and expansion; installed, commissioned and cut over **microwave links (Huawei RTN, NEC)** across 1+0, 1+1, 2+2 and 4+0 configurations including route planning; Huawei DSLAM; configuration and fault resolution via LMT and M2000.

SELECTED TECHNOLOGY PROJECTS (PERSONAL R&D)

- CareerAgent, private agentic AI assistant:** production AI agent with retrieval-augmented memory over a self-hosted vector database, MCP tools and human-in-the-loop approval; Python, FastAPI, Claude LLM, ChromaDB, Google Cloud CI/CD. Demonstrates applied AI, automation and governance skills used in NOC/OSS transformation work.

CERTIFICATIONS AND AWARDS

PMP
Huawei Future Star Award, 2025
Mission Critical Achievement Award, 2023
ITIL v4 and eTOM (practitioner, hands-on)
ISO 27001 and NIST (implementation experience)

EDUCATION AND LANGUAGES

MBA, Global Management - ESLSCA Business School, 2018
BEng, Telecommunications Engineering - Alexandria University, 2009
Arabic (native), English (fluent), French (elementary)
